Education

UPES

Master of Technology, Computer Science Engineering(AIML)

Aug 2025 – May 2027

[CGPA: 7.4]

UPES

Bachelor of Technology, Computer Science Engineering

Aug 2021 – Jul 2025

[CGPA: 7.2]

Skills

Languages C, Python, Java, SQL

Web Technologies HTML, CSS, React

Tools Kaggle, Jupyter Notebook, Google Colab, VSCode, Git/GitHub

Technologies Machine Learning, Deep Learning, Generative AI, Network Security, IoT

Projects

PROJECT 1 – ECOMMERCE WEBSITE USING ML AND NLP TECHNIQUES

- An ecommerce website is developed using HTML, CSS, and JavaScript; and the backend is developed using Python Programming.
- Machine Learning is utilized for developing a recommendation system using a hybrid form of Collaborative and Content filtering.
- Sentiment analysis is widely applied using Natural Language Processing to reviews and survey responses.

PROJECT 2 – CLOUD BASED DOCUMENT EDITING

- Utilizes web-based programs and services for document creation, editing, and collaboration.
- Stores documents in the cloud rather than on a local computer or network server.
- Collaborates with others in real-time on cloud-based documents.
- Accesses and works on documents from any device with internet access.
- Facilitates seamless teamwork and remote collaboration.

PROJECT 3 – Link beats: Amusic player system.

- Provide users with a seamless and immersive music listening experience.
- Offer personalized music recommendations based on user preferences and behavior.
- Develop server-side logic, database schema, and APIs for handling user data, music metadata, and playlists.
- Develop interactive features for music playback, playlist management, and social integration.

Experience

ORGANIZATION – HERE TECHNOLOGIES

- Acquired practical knowledge of web scraping methodologies for strategic applications including market intelligence, competitive benchmarking, and data-driven decision-making.
- Analyzed and evaluated essential web scraping tools and frameworks for efficient data extraction and automation..
- Designed and implemented a web scraping pipeline to extract, preprocess, and analyze structured and unstructured data from a target website.

ORGANIZATION - SPECTRA ORGANIZATION

- Acquired hands-on experience in digital marketing and financial analysis during internship at Spectra Organisation NGO.
- Contributed to numerous projects, refined technical abilities, and gained a firm grasp of best practices in the sector.
- Exhibited a proactive work ethic, shown problem-solving skills, and worked well in a dynamic team. Jun 2024 – Aug 2024

Certifications

HERE TECHNOLOGIES: Web scrapping.

AWS CLOUD THAT: Architecting on AWS.

AWS ACADEMY: AWS academy cloud web application builder.

AWS ACADEMY GRADUATE: Earners of this badge have completed the AWS Academy Introduction to Cloud.
