- Learned about website scraping for strategic purposes such as market research, competitive analysis, and decision making.
- Studied and regularly monitored about the necessary tools which are required for scraping.
- Scraped and worked upon a website as well.

ORGANIZATION - SPECTRA ORGANIZATION

(JUNE 2022- JULY 2022)

- Gained practical experience in digital marketing or financial analysis while interning at Spectra Organisation, a top NGO organisation.
- Contributed to numerous projects, refined technical abilities, and gained a firm grasp of best practices in the sector.
- Exhibited a proactive work ethic, shown problem-solving skills, and worked well in a dynamic team.

PROJECTS

MAJOR PROJECT 1 – ECOMMERCE WEBSITE USING ML AND NLP TECHNIQUES

- An ecommerce website is developed using HTML, CSS, and JavaScript; and the backend is developed using Python Programming Language.
- Machine Learning is utilized for developing a recommendation system using a hybrid form of Collaborative and Content filtering.
- Sentiment analysis is widely applied using Natural Language Processing to reviews and survey responses.

MINOR PROJECT 1 – CLOUD BASED DOCUMENT EDITING

- Utilizes web-based programs and services for document creation, editing, and collaboration.
- Stores documents in the cloud rather than on a local computer or network server.
- Collaborates with others in real-time on cloud-based documents.
- Accesses and works on documents from any device with internet access.
- Facilitates seamless teamwork and remote collaboration.

MINOR PROJECT 2 – Link beats:Amusic player system.

- Provide users with a seamless and immersive music listening experience.
- Offer personalized music recommendations based on user preferences and behavior.
- Develop server-side logic, database schema, and APIs for handling user data, music metadata, and playlists.
- Develop interactive features for music playback, playlist management, and social integration.
